NAV  AIR

# Technical Publication Specialists Information

---

- Provide feedback to NATEC HQ on tech pub problems encountered in the fleet.
- Assist user activities in resolving problems encountered in any phase of technical documentation.
- Assist user activities in distribution, initial outfitting, and automatic distribution problems.

# Enhanced Library Management System

---

- ELMS is a centralized, web-based toolset for technical library management for use by CTPLs. ELMS can be accessed through Technical Manual Application System (TMAPS).
- TMAPS is designed as the Naval Air System Command's (NAVAIR) automated Information and Distribution System. It has been developed to assist with all aspects of Technical Manuals (TM) production and distribution. [www.natec.navy.mil](http://www.natec.navy.mil)

# Enhanced Library Management System

---

- ELMS is meant to replace the FoxPro TPL program. Customer feedback from the last Fleet symposium prompted NATEC to develop this product.
- ELMS represents an end-user IT driven solution.
- Stand-alone version for shipboard and Marine use is anticipated.
- TPS's are currently implementing the ELMS system

# Joint Knowledge Caching Server JKCS

---

- What is JKCS
- PEDD policy statement is in work.
- Outfitting, supply/support of and related equipment.

# Information Supplements

---

- Quarterly Technical Publications Library Information Sheets (TPLIS) are available online at the NATEC website Table of Contents page under NATEC All Hands Information.
- CNAF Aviation Maintenance Advisories (AMA)
- Fleet Aeronautical Library Management Symposium scheduled for 2-6 May 05 DTG 232100Z FEB 05

# CURRENT ISSUES

---

- Inactive Accounts
- Training curriculum is being updated to include ELMS.
- NA-00-500A update is in progress.
- Preliminary Manual policy is being addressed.
- Order restriction of 2 each per pub number, per quarter, through NLL policy was agreed on by the TYCOMs, NATEC Tech Data Competency and the NAMP working group.
